

Caring for Your Jacuzzi with SpaGuard Bromine

Upon fill up:

1. Insert optional **Frog Mineral Cartridge** into filter or onto filter basket
2. Add 2 oz. of **Spa Shock** directly into water
3. Add 2 oz. of **Stain & Scale Control** directly into water
4. Test and adjust Calcium as necessary
5. Wait at least 12 hours and check Ph with **Test Strip**
6. Adjust Ph as necessary with **pH Increaser** or **pH Decreaser**
7. Place 1-3 1” Bromine Tablets in skimmer next to filter(s) or in floater

Weekly Maintenance:

1. Check Ph with **Test Strip** and adjust as necessary
2. Add 2 oz. of **Stain & Scale Control** directly to water
3. Add 2 oz. (per 250 gallons) of **Spa Shock** directly to water
4. Check **Bromine Tablets**

Weekly or as needed:

1. Add 2 oz. of **Water Clarifier** or even better **Enhanced Spa Shock** if water is cloudy
2. Add 2 oz. of **Enzyme** if spa develops a scum line around water
3. Add 2 oz. of **Foam Down and/or Spa Shock** if water is excessively foamy

Monthly:

1. Apply **Cover Care & Conditioner** or **303 Protectant** to cover to protect from UV rays
2. Remove filters from the spa. Use **Filter Cleaning Solution** as per instructions on bottle. Rinse filters thoroughly and reinstall into spa.

Every 3-4 Months:

1. Drain spa and wipe down shell with a cotton towel. Once dry, apply a thin layer of **Fast Gloss** to the shell, allow 15 minutes to dry, and wipe off with a clean cotton towel.
2. Refill spa and refer to the Upon fill up portion above
